Via Ampere 15
20131 Milano

Profile

Willing student looking for job. Experience in working in project of data science, machine learning and deep learning with Python. I'm looking for a motivating environment that allows me to test my competencies and learn some more.

Education

University Luigi Bocconi — 2021 - Today
Bachelor degree in economics, management, and computer science

Current GPA: 29.1/30 e Lode

Expected graduation: July 2024

Salvatore Pizzi high school — 2015-2021
Scientific high school diploma

GPA: 100/100 cum Laude

Working experience

Junior ML developer - UniversalDot Foundation — 2022(Jul) - 2022(Oct)
Development of a recommendation system to match job offer with freelancer profiles using natural language processing algorithms. The model takes as input the profile description of a freelancer and uses it to query an index looking for semantic similarity. Model build in python using Sklearn and Tensorflow frameworks.

Freelancing — 2021-2022
Development of different projects in data science using Python.

Research and development for the production of a binary classification, computer vision model. Built using Tensorflow and integrated in production using FastAPI.
